HOME PRODUCT & SUPPLY SERVICES HOW TO BUY CONTACT & HELP ABOUT US

Industrial gases and Welding consumables

EIL offers a wide range of products, making us the preferred welder's supermarket for **Industrial gases, Gas equipment, Arc Equipment, Welding consumables, Trade tools, Abrasives** and **Welding Safety**.
We pride ourselves continuously in delivering affordable quality and durable products of optimum performances that are distinctively designed to withstand all weather conditions.

EIL Point card…
What a brilliant way to save and even pay for products when you buy from us. Despite the fact that our products are affordable, making us the preferred supplier of our products in this industry, we still have carefully designed a

strategic saving formula for our valued customers because Service is our backbone, our experience is vast, our knowledge is extensive and our support is total.
To get more information on how to get your EIL point card or how to save and pay with your card or what EIL point card means, click How to buy or click contact and help to email us.

EIL Construction (Fabrication) contracting services

EIL also handles multi-million dollar projects in welding fabrication. The business of putting metals into various unimaginable shapes has brought about different combination of industrial gas welding and consumables; hence we have built the technical skills and strength in handling projects in Steel Fabrication, Pipe maintenance, cathodic protection, Gangways, Ladders, Cages, Racks, Loading platforms and many more.

We manufacture in both carbon and stainless steel to nuclear sector standards and have the space and infrastructure to manage large projects, typically for heavy industrial applications. Our capabilities are based on a long standing and highly experienced workforce covering all major trades and engineering positions. We also provide fabrication at customer site, including fully managed dismantling and installation.
For more of our capabilities click Fabrication

Sales or Lease of Heavy Equipment

EIL is Unique to the equipment lease and sales market. EIL has a range and fleet of digging, lifting, blowing, arc welding and many more equipment in this industry.

EIL is hugely popular in the sales and lease of heavy equipment to construction industries because we have an unprecedented fleet of equipment to meet all your construction needs.
Welcome to EIL when you need a professional equipment leasing services. As one of the top plant leaser or sales companies in Nigeria, EIL has one of the most up to date range of heavy equipment thereby giving you safety, reliability, quality and security, along with the dedication, skill and competence of our highly experience team of **equipment specialists.** The rental fleet of our equipment in each category offers us the leading edge in the industry.

EIL can provide all you require for a job, from mobile cranes, swamp buggy, excavator, generator arc welding

machines, generator air compressors, bulldozers and many more including a qualified operator, risk assessment, method statement as well as an appointed person & slingers. For more click *industrial equipment hire*

To get more information or to speak to a member of our team please click Contact and Help or call (+234) 081-5926-0032

If you can think it, is doable. If is doable, is achievable with EIL!

Industrial Gas

EIL is the leading supplier of high purity industrial gases. Our gas covers commercial and private uses and falls into diverse applications. Our Industrial gas product includes Inert gases, Fuel gases, Oxidant gases, other gases and Gas delivery options.

Gas Equipment

EIL only supplies Gas equipment that is manufactured and designed to the highest standard to withstand harsh weather conditions, Optimum performances, consistent reliability and extra safety. Our range includes single and multi-stage regulators, welding nozzles, flashback arrestors, LPG equipment, cutting torches and even more selections of accessories and options.

Arc Equipment

EIL offers the opportunity to hire or buy from our high standard range of Arc welding machines. EIL gives you unprecedented choice of accessories, spares and welding consumables in this capacity.

Welding Consumables

EIL stands the gap to ensure that you get the best quality and durable consumables in delivering exceptional product. We have wide range of consumables such as low hydrogen electrodes, stainless steel electrodes, Aluminium wire and so many more….

Trade Tools

EIL supplies only quality trade tools from leading brands. We dig into facts to ensure that our trade tools are durable and can stand our harsh weather conditions. Be it commercial or private use, we have diverse range of power tools and hand tools to tackle the toughest of jobs for you to end it with a smile.

Abrasives

Our numerous range of abrasives are of durable and high quality to tackle jobs in fabrication, construction, shipbuilding, automotive and aerospace. With this knowledge, we ensure that our abrasives are of highest quality to meet cutting, grinding, sanding or finishing.

Welding Safety

We routinely make sure that our safety products meet standard and are functional. Still, EIL only patronise leading brand because we take safety in the work place very seriously.

Welding and Fabrication

EIL has been in fabrication and construction for many years and has developed an unprecedented tap root in this particular industry, giving us a sustainable competitive advantage. We have experienced team and partners to bring into physical actualization that structure which you can only imagine. If you can think it, is doable and if is doable, is achievable with EIL.

If you can think it, is doable. If is doable, is achievable with EIL!

Industrial Gas

If you can think it,

Is doable.

If is doable,

Is achievable with EIL!

EIL is the leading supplier of high purity industrial gases. Our gas covers commercial and private uses and falls into diverse applications. Major demand and supply of our Industrial gas products includes Inert gases, Fuel gases and Oxidant gases. Find also below some other gases we provide in order to meet your job specification. We deliver our gas in various ways to fit your job purpose. To find out how we deliver them, click Gas Delivery Options.

Oxidant Gases

Oxygen (O_2)

Features (O_2)

- Colourless and odourless
- Does not burn but support and accelerates combustion
- Oxygen reacts violently in contact with oil, greases and solvents.
- Non-toxic at atmospheric pressure.

Compressed Air

Features (compressed air)

- Odourless, Colourless and non-toxic
- Does not burn but support combustion.

Always claim your points for gas equipment that falls within the point system.

You can claim points on most of our gas equipment. Interestingly, our range of gas equipment that falls below the point group can yield up a point or more if bought in quantity in each category and transaction.

To find out more about how you claim points, click EIL point card

Fuel Gases

Acetylene (C_2H_2)

Features (C_2H_2)

- Galic like smell
- Slightly lighter than air and will collect at ceiling level
- Non-toxic but in high concentration may cause dizziness.
- Highly reactive. Acetylene is dissolved in acetone and contained within a porous mass inside the cylinder.

Hydrogen (H_2)

Features (H_2)

- Odourless, colourless and tasteless
- Ignite easily. Must not be snifted
- Burns with an invisible flame
- Lighter than air so will collect at ceiling level

Propane (C_3H_8)

Features (C_3H_8)

- Highly combustible. Explosive limit in air between 2.2% and 9.5% by volume.
- Heavier than air so collects in low lying area e.g. drains.
- Non-toxic but can cause dizziness in high concentration.

Inert Gases

Carbon dioxide (CO_2)

Features (CO_2)

- Colourless and odourless gas. Nose can sting in high concentration.
- Toxic in high concentration
- An asphyxiant
- Slightly corrosive in the presence of moisture
- Heavier than air so will collect in low lying areas e.g. drains
- Highly soluble in water at moderate temperature

Nitrogen (N_2)

Features (N_2)

- Odourless and colourless
- Non-toxic
- Does not support combustion
- An asphyxiant
- Non-reactive but will at very high temperature
- Does not react with oxygen at low temperature
- Inert, dry and slightly soluble

Argon (Ar)

Features (Ar)

- Colourless, Odourless and tasteless
- Inert to all materials at all temperatures and pressures
- Heavier than air so will collect in low-lying areas e.g. drains
- An asphyxiant
- Lower thermal conductivity than most other gas

Other Gases	List	Features

Helium
Refrigerant gases
Ammonia
Gaseous Nitrogen
Liquid Nitrogen
Nitrous Oxide
Industrial compressed air (Non-breathable)
Breathable air on request
Argon/CO_2 mix
Helium and Mixes

Helium (He)
- Colourless and odourless
- Non-toxic, non-corrosive and non-combustible
- It has the lowest boiling point of any gas and as a result liquid helium is the coldest matter on earth.

Ammonia (NH_3)
- At room temperature is a colourless and highly irritating gas with a purgent, suffocating odor
- It has an alkaline properties and is corrosive
- Not highly flamable but containers of ammonia may explode when exposed to high heat.
- Gas is easily compressed and forms a clear liquid under pressure.

Gas Delivery Options

If you can think it,

Is doable.

If is doable,

Is achievable with EIL!

EIL is the leading supplier of high purity industrial gases. Our gas covers commercial and private uses and can be supplied as single compressed cylinder, compressed cylinders in Pallets or Manifold cylinder pallets. We understand that the demand for industrial gas is relative to the nature of job hence EIL has a defined gas delivery options to suite your job specification and demand in numerous range and sizes.

To find out more on how to buy or supply, call us on (+234) 084-301-967 or Send Email...

Single or Mix and Match compressed gas cylinders

We understand that your need is relative to your job type. EIL supplies single compressed cylinders in numerous range and sizes and also in Mix and match. Mix and Match means supplying more than one cylinder but not the same gas content, e.g. Four cylinders to include two Oxygen, one Acetylene and one Argon.
We also refill own cylinder/s. Where your job is on-going, we fill in the gap by giving exchange of same size cylinder pending when your cylinder has been refilled.
Always claim your point for every cylinder you buy, which means the more you buy the more point you get.
To find out more about how you claim points, click EIL point card

Compressed cylinders in racks

EIL supplies numerous range and sizes of compressed cylinders for exchange or refill of own racked cylinders. Our racks are lift tested and certified. They are designed to be lifted by crane or forklift, therefore we advise that upon delivery that you lift pallet off the delivery truck by crane or forklift.
Always claim your point for every cylinder you buy. The more you buy the more point you get.
To find out more about how you claim points, click EIL point card

Manifold cylinder Rack

The Manifold cylinder rack is a cylinder bank designed to store high pressure cylinders, allowing you to control and easily maintain these cylinders by linking them into single or dual outlet.
EIL supplies manifold cylinders in different range and sizes. Our racks are lift tested, certified and designed to be lifted by crane or forklift truck. We strongly recommend that upon delivery of manifold cylinder rack, that you transport to designated area by a crane or forklift truck.
Always make sure you claim your point on every cylinder you buy. The more you buy, the more point you get.
To find out more about how you claim points, click EIL point card.

Gas Equipment

If you can think it,

Is doable.

If is doable,

Is achievable with EIL!

At EIL, we pride ourselves in supplying Gas equipment that are manufactured and designed to the highest standard to withstand our harsh weather conditions and for Optimum performances, consistent reliability and extra safety. Gas equipment are of numerous range and brand in the market but at EIL, we only patronise leading brand because we understand the potential hazard that could be associated with welding jobs if quality gas equipment are not in use.
Below is a list of some Gas equipment range.

To find out more on how to buy or supply, call us on (+234) 084-301-967 or Send Email...

Gas equipment range

Complete welding set

Different options of complete welding set designed for either;

1. oxy-acetylene welding and cutting
2. welding, brazing, heating and cutting application
3. PortaPak light-duty cutting, heating and welding and
4. Light-duty heating and welding.

Always claim your point for gas equipment that falls within the point system.

You can claim points on most of our gas equipment. Interestingly, our range of gas equipment that falls below the point group can yield up a point or more if bought in quantity in each category and transaction.

To find out more about how you claim points, click EIL point card

Industrial gas regulators

Cutting torches and attachments

Different durable and high standard brands includes;

5. Multi-stage Heavy-duty regulators
6. Single-stage medium heavy-duty regulators
7. Single-stage single gauge regulators
8. Single-stage portapak light-duty regulators
9. Single-stage refrigeration regulators
10. High-pressure regulators
11. Flow gauge and Flowmeter regulator

We only patronise leading brands to ensure that our customers get the best result. Our supply include

12. Standard or long Cutting torch
13. Cutting attachment
14. Welding shank

Cutting nozzles

We supply different shapes and sizes of oxy-acetylene and oxy-propane cutting nozzles for optimum performance and durability which includes;

15. Single-piece acetylene nozzle
16. Light-duty acetylene nozzle
17. Two-piece propane nozzle
18. Light-duty acetylene nozzle
19. Gouging nozzle
20. Metal cutting nozzle

Gas hoses and fittings

EIL also supply gas hoses which includes;

21. Oxygen and Acetylene hose
22. Propane hose
    and high quality fittings to include;

23. Hose nipples and adaptors
24. Hose splicers and check valve
25. Hose couplers
26. Coupling nuts and Clips

Welding nozzles

We also supply welding nozzles for oxy-acetylene heavy-duty welding and brazing. They come in different length and sizes to fit your job description.

Heating nozzles and necks

EIL supplies heating nozzles and necks for optimum performances and durability which includes;

27. Acetylene heating nozzle
28. Propane heating nozzle
29. Acetylene heating unit
30. Acetylene heating neck
31. Propane heating neck

Flashback arrestors

Gas control manifold systems

We supply Flashback arrestors of high quality to include;

32. Standard flashback arrestors

Resettable flashback arrestors

We supply manifold hoses designed with protective cover to include;

33. High pressure industrial gas hoses
34. High pressure acetylene hoses
35. High pressure oxygen and oxygen mixture hoses.

LPG equipment

EIL supplies wide range and brands of LPG equipment, some to include;

36. Torch handle
37. Propane torch kit
38. Brazing handle
39. Variable regulator
40. Low pressure regulator
41. Clip-on regulator
42. High pressure hose
43. Spanner
44. Hose connector and Clips

Gas and welding accessories

EIL also supplies a wide range and brand of gas and welding accessories. Some of them to include;

45. Spark lighter
46. Pliers
47. Spindle keys
48. Nozzle cleaner set
49. Saw blades

Cylinder trolleys

At EIL, we supply foreign or own built cylinder trolley to include;

50. Single-cylinder trolley
51. Oxy-acetylene heavy-duty trolley
52. Oxy-propane heavy-duty trolley
53. PortaPak cylinder stand or trolley

Cylinder cages and racks

EIL builds cages, pallets or racks of different sizes and capacity to meet customer demand. Cages are built as fixed storage cylinder unit while pallets/racks are built to enable cylinders to be transported from point **A** to point **B**. All racks designed by EIL are lift tested before supply.

We have more product in stock. Send email or call us on (+234) 084-301-967 to find out about product of interest that is not listed or to get a quote.

If you can think it, is doable. If is doable, is achievable with EIL!

GAS EQUIPMENT & ACCESSORIES

At EIL, we supply quality affordable gas equipment and accessories of different brands. These equipment and accessories has been designed for optimum performance, extra safety and consistent reliability.

Our product range;

WELDER OUTFIT SET

- WELDINGPAK SET
- MASTER START SET
- PORTAPAK SET
- PROMASTER SET

CUTTING TORCHES

- SHORT CUTTING TORCH
- COMBI CUTTING ATTACHMENT
- LONG CUTTING TORCH
- COMBI SHANK

- COMBI-LITE CUTTING ATTACHMENT
- COMBI-LITE SHANK

MIXERS (COMBI MIXERS)

- HEAVY-DUTY ACETYLENE MIXER
- MEDIUM-DUTY ACETYLENE MIXER
- MEDIUM-DUTY PROPANE MIXER
- LIGHT-DUTY ACETYLENE MIXER

WELDING NOZZLES (DIFFERENT SIZES)

- COMBI-MEDIUM WELDING NOZZLE
- COMBI-LITE WELDING NOZZLE

HEATING NECKS

- COMBI ACETYLENE HEATING NECK
- COMBI PROPANE HEATING NECK
- COMBI-LITE ACETYLENE HEATING UNIT

HEATING NOZZLES (DIFFERENT TYPES)

- COMBI ACETYLENE HEATING NOZZLE
- COMBI PROPANE HEATING NOZZLE

CUTTING NOZZLES (DIFFERENT SIZES)

- COMBI ANM SINGLE-PIECE COPPER CONSTRUCTION ACETYLENE NOZZLE
- COMBI PNM TWO-PIECE COPPER AND BRASS CONSTRUCTION PROPANE NOZZLE
- COMBI-LITE AFN SINGLE-PIECE LIGHT-DUTY ACETYLENE NOZZLE
- COMBI AGNMGOUGING NOZZLE
- COMBI ASNM SHEET METAL-CUTTING NOZZLE
- COMBI-LITE ASFM SHEET METAL-CUTTING NOZZLE

INDUSTRIAL REGULATOR

- SERIES 9500 MULTI-STAGE REGULATOR (OXYGEN)
- SERIES 9500 MULTI-STAGE REGULATOR (ACETYLENE)
- SERIES 9500 MULTI-STAGE REGULATOR (NITROGEN ARGON)
- SERIES 9500 MULTI-STAGE REGULATOR (CARBON DIOXIDE)
- SERIES 9500 MULTI-STAGE REGULATOR (HYDROGEN)
- SERIES 9500 MULTI-STAGE REGULATOR (AIR)
- SERIES 9500 MULTI-STAGE REGULATOR (HELIUM)
- SERIES 8000 SINGLE-STAGE MEDIUM-HEAVY-DUTY REGULATOR (OXYGEN)
- SERIES 8000 SINGLE-STAGE MEDIUM-HEAVY-DUTY REGULATOR (ACETYLENE)
- SERIES 8000 SINGLE-STAGE MEDIUM-HEAVY-DUTY REGULATOR (NITROGEN)
- SERIES 6000 SINGLE-STAGE SINGLE-GUAGE REGULATOR (PROPANE)
- SERIES 5000 PORTAPAK REGULATOR (OXYGEN)
- SERIES 5000 PORTAPAK REGULATOR (ACETYLENE)
- SERIES 6000 SINGLE-STAGE REFRIGERANT REGULATOR (NITROGEN)

- SERIES HP MULTI-STAGE NITROGEN REGULATOR
- SERIES 6000 FLOWGAUGE REGULATOR ArC 40L (ARGON CARBON DIOXIDE)
- FLOWMETER (MIG OR TIG WELDING)
- SERIES HP SINGLE-STAGE NITROGN REGULATORS
- SERIES 6000 PRE-SET ArC 2 TIG (ARGON CARBON DIOXIDE)
- INTEGRATED REGULATOR FLOWMETER (MIG OR TIG WELDING)

LABORATORY REGULAOTR

- SERIES 8500 NITROGEN OR ARGON REGULATOR
- SERIES 8500 HYDROGEN REGULATOR
- SERIES 8500 OXYGEN REGULATOR
- SERIES 8500 CARBON DIOXIDE REGULATOR
- SERIES 8500 HELIUM REGULATOR
- SERIES 8500 AIR REGULATOR

SPECIAL GAS REGULATOR

- MOT FLOW REGULATOR (MOT TEST GAS MIXTURES)
- NON-CORROSIVE LABORATORY REGULATOR (FOR PURE AND PREMIX LASING GASES TO LASER AND OTHER NON-CORROSIVE GENERAL PURPOSE USE)
- BS 341 no3, RH THREAD LABORATORY GAS REGULATOR (LAB SPECIFICATION NON-CORROSIVE GASES AND GAS MIXTURES, i.e HELIUM, NITROGEN, ARGON, OXYGEN)
- CARBON DIOXIDE REGULATORS (FOR FOOD PACKAGING)
- NON-CORROSIVE LABORATORY REGULATOR (CARBON DIOXIDE)
- BS 341 no4, RH THREAD LABORATORY GAS REGULATOR (LAB SPECIFICATION NON-CORROSIVE GASES AND GAS MIXTURES, i.e HELIUM, NITROGEN, ARGON, OXYGEN)

FLASHBACK ARRESTORS

- RESETTABLE OXYGEN FLASHBACK ARRESTOR
- PREMIER OXYGEN FLASHBACK ARRESTOR
- STANDARD AIR/OXYGEN FLASHBACK ARRESTOR
- RESETTABLE FUEL GASES FLASHBACK ARRESTOR (ACETYLENE, NATURAL GAS, PROPANE AND HYDROGEN)
- PREMIER FUEL GASES FLASHBACK ARRESTOR (ACETYLENE, PROPANE/NATURAL GAS, METHANE AND HYDROGEN)
- STANDARD FUEL GASES FLASHBACK ARRESTOR (ACETYLENE, NATURAL GAS, PROPANE AND HYDROGEN

Arc Equipment

If you can think it,

Is doable.

If is doable,

It is achievable with EIL!

*EIL offers the opportunity to hire or buy from our high standard range of Arc equipment. We have heavy-duty rugged Arc welding generators to bear the load of high demanding jobs. To see the benefits of hiring from EIL, click **Industrial Equipment hires**. EIL gives you unprecedented choice of accessories, spares and welding consumables in this capacity to ensure continuity at every stage of your job.*
See wide range of products below.

*To find out more on how to buy or supply, call us on (+234) 084-301-967 or Send **Email**...*

Arc equipment range

TIG machines

Different amps of rugged Tungsten Inert Gas (TIG) electric machines are supplied or hired to execute the toughest of jobs. These machines deliver low amperage starting, welding and cratering for AC and DC welding. They burn through thin materials and improve appearance.

Always claim your point for Arc equipment that falls within the point system.

You can claim points on most of our Arc equipment. Interestingly, our range of Arc equipment that falls below the point group can yield up a point or more if bought in quantity in each category and transaction.

*To find out more about how you claim points, click on **EIL point card***

TIG torches and accessories

MIG machines

EIL also supplies TIG torches of different range depending on the application. We supply;

1. Water-cooled torches
2. Air-cooled torches

We supply or hire out the Metal Inert Gas (MIG) machines. The MIG machine is of optimum performance when cosmetic appearance is an issue since it provides lower splatter level than flux-cored. Is less likely to burn through thin material. The lower spatter means no slag to chip off and faster cleaning time.

Plasma machines

We supply or hire out leading brand of plasma welding machines that are designed for cutting expanded metal, stainless steel and aluminium. It has a lightweight that makes it possible to be carried easily, with less heat, more power and greater longevity. These plasma machines has automatic or in-built air pressure regulator for optimum cutting and gouging performance. Uses standard compressed air.

MMA machines

EIL supplies or hire out the Manual Metal Arc (MMA) welding machine.These machines are designed to be waterproof, anti-static, anti-corrosive, lightweight and energy-saving. More so they are designed to have good arc-starting and arc force, anti-sticking, high welding quality, deep penetration and high intensity.

Plasma torches

EIL also supplies plasma torches. These Ergocut torch are designed to have lightweight and to reduce the amount of heat striking the hand of the operator. To protect the hand better against cutting splash the handle is moved back few centimetres thereby reducing the temperature of the trigger.

MIG guns and accessories

We also supply MIG guns and accessories to replace worn out parts. We have wide range of MIG guns designed to provide balance, reduce operator fatigue with a sure confident grip. They are designed to be felt through welding gloves for users to have full control of the machine.

Welding generators

EIL hires out excellent rugged welding generators of high standard and high capacity DC. On demand, we sell or order these machines according to specification.

Arc and welding accessories

At EIL, we only supply high standard Arc and welding accessories to ensure that our customers expectations are exceeded. We have a wide range of product for optimum performances and durability. Our range includes;

3. Welding cables
4. Cable connectors and lugs

These Arc welding machines with Perkins engine are designed to have dual continuous output control which supports continuous adjustment of voltage and current to select either a soft buttery arc for fast and high quality welding.

5. Lead set
6. Clamp
7. Spring handle- chipping hammer
8. Wood handle- chipping hammer
9. Wire brush

We have more product in stock. Send email or call us on (+234) 084-301-967 to find out about product of interest that is not listed or to get a quote.

If you can think it, is doable. If is doable, is achievable with EIL!

EMMADIOS INDUSTRIAL LIMITED

ARC EQUIPMENT AND ACCESSORIES

EIL offers you an extensive range of Arc equipment that are designed for advanced capabilities and superior functionalities with a full complement of accessories, spares and welding consumables.

Our product range;

EQUIPMENT

- TIG WELDING MACHINE
- MMA WELDING MACHINE
- PLASMA WELDING MACHINE
- MIG WELDING MACHINE
- WELDER GENERATOR 400 TO 500AMS
- SOLDERING IRON TOOL

ACCESSORIES

- BIG INDUSTRIAL REGULATOR CLOCK
- MUREX SAFFIRE FLUX
- WELDING MASK (BLACK)
- SAW BLADE
- VICTOR CUTTING TORCH HAND GLOVE
- ELECTRODE HOLDER 500AMPS,600AMPS
- CABLE CONNECTOR 25MM & 50MM (MALE AND FEMALE)
- EARTH CLAMP
- APRON
- SAF PROMUG 350-3M WELDING
- ESAB ELECTROD HOLDER 400AMPS
- 95MM CABLE WELDING
- WELDMAN LEATHER APROM
- WELDMAN LEATHER LEG GUARD
- MEASURING TAPE 3.5MM,7.5MM,5.0MM
- FIXOLID
- CRIMP TOOL FERRULE CLIP
- FLASH BALL
- FAT PLAIN WELDING LENS GLASS
- MORSAFE FLLER PLATE DARK GLASS
- ELECTRICAL HAND GLOVE
- WOOD HANDLE CHIPPING HAMMER
- TIG TORCH
- SIFBRONZE-FLUX
- PLAN FACE MASK
- DARK AND PLAIN GOOGLE
- RUBBER HAND GLOVE
- COMBINATION HAND GLOVE
- OPTIMUS 600AMPS ELECTRODE HOLDER
- FIXOLID 10 METAL MARKERS TYPE T(YELLOW)
- SPARK LIGHTER
- ARC-AIR TORCH
- ELECTROD HOLDER SCREWTYPE 500AMPS
- 50MM CABLE WELDING
- TILLMAN WELDING HAND GLOVES
- WELDING CHORC
- LEATHER WELDING MASK
- CHIPPING HAMMER 300G
- WELDERS JACKET
- TIP CLEANER
- CABLE LUG (REUSABLE)
- WELDING PROTECTION DARK GLASS
- NOSE & DUST MASK
- SPRING HANDLE CHIPPING HAMMER
- SOLDERING FLUID
- ERGOPLUS

Welding Consumables

If you can think it,

Is doable.

If is doable,

Is achievable with EIL!

EIL stands the gap to ensure that you get the best quality consumables in delivering exceptional product. At EIL, we only patronise leading brand in order to give our customers a parallel experience and confidence in show casing their finished product. We have a wide range of welding consumables to bring your EILtract to reality with ease.
See wide range of product below.

To find out more on how to buy or supply, call us on (+234) 084-301-967 or Send Email...

Welding consumables in range

MIG WIRE*: The MIG wire provides all the alloying for the weld metal. The solid MIG wires are categorised by the general alloy group and the main grouping includes;*
Aluminium alloys, Carbon and Alloy steel, Stainless steel, Copper alloys, Nickel alloys and Titanium alloys.
In general, wires are produced for all of these materials but some may be more available than others due to availability of material composition.

Always claim your point for welding consumables that falls within the point system.

You can claim points on most of our welding consumables. Interestingly, our range of welding consumables that falls below the point group can yield up a point or more if bought in quantity in each category and transaction.

To find out more about how you claim points, click on EIL point card

Mild steel solid MIG wire

Stainless steel solid MIG wire

EIL supplies good quality Mild steel solid MIG wire in different diameters that provides low spatter and excellent performance. These copper coated solid steel wires are not soluble in water and none toxic. They are good for wide variety of MIG welding for mild and low alloy steels.

EIL supplies quality stainless steel solid MIG wires in different diameters that are designed for excellent corrosion resistance. These wires are good for the joining and overlay of stainless steels of similar composition and of dissimilar steels, low alloy steel to stainless.

Aluminium MIG wire

Aluminium as a fabrication material is becoming common placed in fabrication shops of all sizes so skills must be required to weld this often mysterious and difficult metal. EIL supplies aluminium MIG wires of different diameters which of course has property of corrosion resistance. Theses wires are recommended for use on Aluminium alloys with skilled hands.

TIG WIRE: *TIG wire/rods have diverse applications and cannot really be pin pointed to a particular type of welding. TIG rods are available on variety of steel to include Aluminium, Carbon and Alloy steel, Stainless still, Cast iron, Copper alloys, Nickel alloys and Titanium. In general, rods are produced for all of these materials but some may be limited due to availability of material composition.*

Stainless steel TIG wire

EIL supplies various diameters of Stainless steel wires designed for joining and overlay of stainless steel of similar composition and joining and overlaying of dissimilar composition depending on the metal composition.

Aluminium TIG wire

EIL also supplies Aluminium TIG wire that are of higher corrosion resistance in different diameters. We supply Aluminium TIG filler wire for the repair and reclamation of silicon bearing aluminium alloys, Magnesium bearing Aluminium Alloys and Magnesium/Manganese bearing Aluminium Alloys.

MMA ELECTRODES: *Manual Metal Arc (MMA) ''STICK'' Welding coated electrode consist of a core and a coating. The core consist of a metal conductor rod, covered with a flux coating whose sole purpose is to supply welding material to the piece. The flux is extruded concentrically around the core wire. The metal core may be Carbon steel, Alloy steel, Stainless steel, Nickel alloy, Copper alloy, Cast iron, Aluminium alloy or even special hard-facing alloys. The coating may contain many different metallic and non-metallic compounds, including Oxides, Carbonates, Fluorides, Organic materials and metal powders, all held together with Silicate binders*

Mild steel electrode

Low hydrogen electrodes

EIL supplies a wide range of leading brand of Mild steel electrode in different sizes to tackle welding jobs in all positions to handle clean structural steel.

EIL supplies Low Hydrogen electrode of different sizes, applications and brands that are moisture-resistant. These electrodes are designed for general welding on mild steel or metal construction to give excellent slag removal and almost spatter free.

Nickel electrodes

EIL supplies Nickel electrodes of different sizes, applications and brands. We supply pure Nickel electrode for cold welding grey and malleable cast iron and for joining base metals to steel, copper and copper alloys. The electrode deposits a high grade Nickel weld metal which is ideal for repairing cracks and designed also to weld in deep holes or on parts where the coating may touch the casting.
We also supply Ferro-Nickel electrode deposit for joining and repairing Nodular cast iron.

Stainless steel electrodes

EIL also supply Stainless steel electrode of different sizes, diverse applications and brands. We supply these electrode to tackle jobs either for welding and cladding on austenite Cr-Ni-Mo stainless steel and clad plates or for welding dissimilar steels (stainless steel with low alloyed steels) and steels difficult to weld such as tool steel, Mn steels, spring steels, metal deposit highly resistant to crack, for buffer layers before hard-facing and for building up cutting tools or for welding dissimilar steels as stainless steels to low alloyed steels.

We have more product in stock. Send email or call us on (+234) 084-301-967 to find out about product of interest that is not listed or to get a quote.

WELDING CONSUMABLES

We supply massive range of welding consumables including fluxes and electrode heaters of leading brand to give you exceptional output.

Our range of welding consumables;

MMA ELECTRODES (DIFFERENT SIZES)

- MILD STEEL ELECTRODES
- Ni PURE NICKEL ELECTRODES
- NiFe FERRO NICKEL ELECTRODES
- CAST IRON ELECTRODES
- LOW HYDROGEN ELECTRODES
- STAINLESS STEEL ELECTRODES
- HARD FACING ELECTRODES
-

MIG & TIG WIRE (DIFFERENT DIAMETERS)

- MILD STEEL MIG WIRE
- ALUMINIUM MIG WIRE
- ALUMINIUM TIG WIRE
- STAINLESS STEEL MIG WIRE
- STAINLESS STEEL TIG WIRE

Trade Tools

If you can think it,

Is doable.

If is doable,

Is achievable with EIL!

When the going gets tough, only the tough gets going that is why at EIL, we dig into facts to ensure that our trade tools are durable, of optimum performances and can stand our harsh weather conditions. Be it commercial or private use, we have diverse range of power tools and hand tools to tackle the toughest of jobs for you to end it with a smile.
We have a wide range of affordable Trade tools to give your job a perfect finishing.

See wide range of trade tools below.

To find out more on how to buy or supply, call us on (+234) 084-301-967 or Send Email...

Trade tools range

POWER TOOLS*: these are tools that are driven by motors. They are either stationary (corded with an AC power supply) power tools or portable/mobile (Cordless with a DC power supply) power tools.*

You can claim points on most of our trade tools. Interestingly, our range of Trade tools that falls below the point group can yield up a point or more if bought in quantity in each category and transaction.

To find out more about how you claim points, click on EIL point card

Corded Angle grinders

EIL supplies good quality durable corded angle grinders

Cordless Angle grinders

EIL supplies good quality and durable cordless angle grinders of different brands that are designed for

of different brands that are designed for cutting, grinding and polishing. These machines are comfortable to handle and control with a side-handle for two-handed operation, no speed load and disc diameter of 230mm.

cutting, grinding and polishing. These machines are of smaller circumference with disc diameter of 115mm, no speed load, side handle for two-handed operation, fast charger and with two or three long lasting batteries depending on the brand.

Drill driver, Combi drill or Twin Pack deals

EIL supplies quality and durable different brands of Drill drivers, Combi (combination) drills or twin pack deals which comprises of a drill driver and combi drill (body only) or a drill driver and impact driver (body only).
The drill drivers are designed for drilling (boring holes) and driving (fastening or driving screws). The drill drivers, drills through wood, plastic and steel. The combination drill comes with the capability of the drill driver and the hammering feature. With the combination of the rotatory and the hammering motion both cuts and drills through masonry surfaces (brick, concrete, and stucco).

Impact tools

EIL supplies quality and durable impact tools of different brands. The impact tools includes impact driver, impact wrench and impact drill.
The impact drivers deliver a strong sudden rotation and are designed for stubborn screws that are corrosively frozen or over torque on metal, concrete and wood.

The impact wrench is of similar application like the impact drill but of higher torque and faster speed while the Impact drill are designed for hammer drilling, drilling and screw driving. It has quick-action keyless chuck.

Combi Packs

EIL also supplies leading brands of Combi packs for your all in one finishing. With this brilliant idea, you can get a good deal in price to equipped you with combination of:

1. Combi drill
2. Impact driver
3. 165mm circular saw
4. Reciprocating saw with tool-free blade change

115mm angle grinder with overload protection

Diamond blades/ Cutting blades

EIL supplies a wide range of diamond and cutting blades (Evolution rage 1-4) of different diameters and thickness.
These diamond and cutting blades are designed for multipurpose cutting system ideal for cutting concrete, stones, paving slEIL and brick.
Also make sure you buy the Evolution cutting fluid which helps to cool and lubricates the cutter head and maintain cutter life.

HAND TOOLS: *these are tools that are powered manually by hand. These tools are easily operated but also require skills to get best result and increased life spam.*

Hacksaw/junior Hacksaw

EIL supplies quality durable Hacksaw and junior Hacksaw designed to cut through metal (alloy and stainless steel). The saw blade can easily be changed when worn.

Hacksaw blade

We supply durable saw blades of optimum performances in any quantity. These saw blades are designed to cut through alloy and stainless steel.

Adjustable wrench

Combination & double open end spanner set

We supply durable and high quality adjustable wrench of different sizes (Jaw width and length) to give you the assistance you need in tackling measurement on jaw to fit your job task.

We supply combination or double open end spanner set of good quality. This spanners are plated with Nickel and matt chrome plated finished or Nickel and chrome-plated, fine-polished finished. We have more range of spanners even in single order.

Socket set

We supply quality and durable socket set of different inches and pieces. They are manufactured from chrome vanadium steel hardened, tempered and chrome plated for corrosion protection.

File set/Screwdriver set/plier set

We supply quality and durable different sets and single sizes of files, screwdrivers and pliers. These sets are fitted with good grip to give you perfect control of your job.

Cutters/pipe wrench/fencing pliers

EIL supplies a wide range of quality and durable cutter, pipe wrench and fencing pliers. The hand tools are fashioned to give a good grip and control in dealing with tough jobs.

Hammers

We also supply quality and durable hammers of different heads sizes and length. They are designed to have a good grip to give you perfect control in doing your job.

Retractable knife

We supply solid retractable knife made of die-cast metal body.

Measuring tape/stainless steel ruler

We supply locking tape with abrasion resistant coating and stainless steel ruler. They are designed to be durable and work perfectly considering our weather conditions.

Clamps

Storage boxes

At EIL, we supply clams such as Carver rack clamp, G-clamps and Lockjaw clamp. These clamps are plated with high quality material to make them durable and give optimum performances.

At EIL, we supply storage boxes on demand built to your specification. Bigger boxes are designed to be lifted by forklift truck or pallet truck. We only use high quality materials to build these boxes to retain its shape regardless of his content.

We have more product in stock. Send email or call us on (+234) 084-301-967 to find out about product of interest that is not listed or to get a quote.

Welding and Fabrication

Abrasives

If you can think it,

Is doable.

If is doable,

Is achievable with EIL!

Our numerous ranges of abrasives are of high quality and leading brands to tackle jobs in fabrication, construction, shipbuilding, automotive and aerospace. With this knowledge, we ensure that our abrasives are of highest quality to meet cutting, grinding, sanding or finishing.
We have extensive range of affordable Abrasives to give your job a perfect cutting or grinding or sanding or finishing.

See diverse ranges below.

To find out more on how to buy or supply, call us on (+234) 084-301-967 or Send Email...

Abrasives range

Pipeline brushes

EIL supplies Pipeline brushes of high quality and durability. These aggressive twist knot brushes are designed for heavy duty applications such as preparation and finishing of seam welding and deburring (a finishing method used to smooth ragged edges on wood or metal).

Always claim your point for Abrasives that falls within the point system.

You can claim points on most of our Abrasives. Interestingly, our range of Abrasives that falls below the point group can yield up a point or more if bought in quantity in each category and transaction.

To find out more about how you claim points, click on EIL point card

Bevlled/conic brushes

Cup brushes

We also supply bevelled/conic shape brushes of high quality and durability that are crimped wired for less aggressive application. These brushes are designed for irregular surfaces with edges or cracks.

EIL supplies cup brushes of high quality and durability. These high density brass dipped crimped wire are designed for polishing and surface preparation.

Non-woven hand pads

At EIL, we also supply high quality and durable non-woven hand pads to provide a nice finishing on various surfaces. These hand pad includes;

1. **Green non-woven hand pad;** used for general purpose cleaning on both flat and shaped surfaces by hand. By application, it is highly recommended for stainless steel and Inox. Also recommended for steel, construction steel, low-alloy steel, high alloy steel, non-ferrous, tiles, ceramics, glass, plastics and PVC
2. **Maroon non-woven hand pad;** use for premier keying, deburring of plastics, and gives a stain metal finishing. By application, it is highly recommended for thin sheets, plates, profiles, stainless steel and Inox. Also recommended for Steel, construction steel, low- alloy steel, high alloy steel and non-ferrous.

Non-woven surface conditioning disc

We supply quality and durable non-surface woven conditioning disc which includes;

3. **Coarse:** designed for aggressive cutting action to remove contaminants.
4. **Medium:** designed to achieve a good medium scratch Patten finish. Best results are on soft metals or expensive alloys.
5. **Fine:** designed for excellent fine scratch patten and uniform finish. Ideal choice for fine finishing and pre coat finishing. By applications, they are highly recommended for stainless steel and Inox. Also recommended for steel, construction steel, thin sheets, platesm profiles and non-ferrous.

Metal grinding disc

EIL supplies high quality and durable brands of DPC metal and stone grinding discs that are long lasting with a cleaner finish. These discs perform with extended cutting and grinding with low dust generation. Free of iron, sulphur and chlorine giving non-contamination of stainless steel. These long life discs are highly recommended for high Alloy steel, Stainless steel and Inox. Also recommended for steel, construction steel, low-Alloy steel and cast iron.

Fibre back discs

We supply quality and durable Ali oxide, Zirconium and Ali oxide stainless steel fibre back discs that are designed for cleaning and preparing steel surfaces for welding and cleaning of mig and tig welds and for deburring and weld blending on metal surfaces. By application, Ali Oxide fibre back discs are highly recommended for Steel, construction steel. Also recommended for thin sheets, plates, profiles and non-ferrous. While for Zirconium and Ali Oxide stainless steel fibre back discs, they are highly recommended for stainless steel and Inox. Also recommended for Steel, construction steel, thin sheets, plates and profiles.

Cutting discs

Flap discs and flap wheels

EIL supplies high quality and durable brands of cutting discs with good grain retention for longer life and more constant cleaner cuts in different inches and sizes(mm) to include;

6. **Multi-purpose disc:** this unique multi-purpose disc does cooler cut in less time with less noise, dust and material lost while delivering stable and safe straight precise cuts. These discs are highly recommended for non-ferrous jobs but also recommended for Titanium, stone concrete, tiles, ceramic, glass, plastics, PVC and aluminium.
7. **Super-thin Inox disc;** these discs are highly stable, free of iron, sulphur and chlorine. They deliver fast, easy and comfortable cutting making it suitable for most trades such as sheet-metal working and car maintenance. By application, it is highly recommended for high alloy steel, thin sheets, plates, profiles, stainless steel and Inox but also recommended for steel, construction steel, low-alloy steel, non-ferrous and titanium.
8. **Ultra-thin DPC disc;** these discs are free of iron, sulphur and chlorine. They deliver fast, easy and comfortable cutting with a maximum cutting capacity of 1.9mm making it suitable for most trades such as sheet-metal working and car maintenance. By application, it is highly recommended for high alloy steel, thin sheets, plates, profiles, stainless steel and Inox but also recommended for steel, construction steel, low-alloy steel, non-ferrous and titanium.
9. **Rail cutting disc;** these disc are used on a rail saw for cutting rail track sections. They are highly recommended for rail but also recommended for steel, construction steel, low-alloy steel, high alloy steel, stainless steel and Inox

EIL supplies quality and durable brands of Zirconium flap discs and Ali oxide flap wheels of different inches and sizes (mm).

10. **Zirconium flap disc**; these conical (Convex) shape which is used on curved and more difficult to access areas, as well as for flat surface grinding operation are made using premium zirconia grain. These abrasives flaps are positioned to wear evenly so that new grits are exposed to maintain a uniform action over a long period of time.
    The flap disc are designed for cleaning/preparing steel and stainless steel surface for welding and cleaning down small MIG and TIG welds ready to finish. Furthermore, to have fibre glass backing, low set up time, reduced noise level, cool grinding action, anti-clogging technology, no back up pad required, for rough grinding and extra-long life. By typical application, it is highly recommended for Steel, construction steel and aluminium. Also recommended for stainless steel and Inox.
11. **Ali Oxide flap wheels;** these wheels are designed for finishing brass, aluminium and steel/sateen finishing, removing stone chip coating, paint and rust. Application includes metal finishing and fabrication.

Drill bit set

We also supply quality and durable drill bit set of different piece, size and shape to enhance performance and multiple choices of drill bit when using the power tool drill driver.

Screwdrivers set

At EIL, we supply quality and durable screwdrivers of different pieces, sizes and shapes to enhance performance and multiple choices of screwdrivers when using the power tool screwdriver.

Back up pads

We also supply quality and durable back up pads for use with fibre discs, designed to increase the life and performance of the fibre disc.

We have more products in stock. Send email or call us on (+234) 084-301-967 to find out about product of interest that is not listed or to get a quote.

If you can think it, is doable. If is doable, is achievable with EIL!

Welding Safety

If you can think it,

Is doable.

If is doable,

Is achievable with EIL!

We routinely make sure that our safety product meet standard and are functional. Still, EIL only patronise leading brand because we take safety in the work place very seriously. We have affordable extensive range of high quality and durable welding safety to give you the protection and confidence you need in your work environment.

See diverse range below.

To find out more on how to buy or supply, call us on (+234) 084-301-967 or Send Email...

Welding Safety range

Safety Helmet

We supply high quality and durable polypropylene Red, Yellow, White or Blue endurance Safety helmet. These shell endurance Helmet combines a perfect fit with a look that wearers prefer. The sleek, trim shell safety helmet is lightweight, high-density polypropylene with a rain gutter. Also designed with improved suspension harness that boots user comfort as well as providing exceptional balance in a four point slot.
(Compactible with clip on ear protector)

Welding Helmet

Always claim your point for welding safety that falls within the point system.

You can claim points on most of our Welding safety. Interestingly, our range of Welding safety that falls below the point group can yield up a point or more if bought in quantity in each category and transaction.

To find out more about how you claim points, click on EIL point card

Respiratory

EIL supplies high quality and durable brands of welding helmet to include;

1. **Auto-darkening welding helmet:** these unique set of welding helmet with wide view area are suitable for MMA, MIG and TIG welding. They are designed to automatically darken within a fraction of a millisecond to the correct level of protection with an arc ignition. The brilliant solar cell design enables the use of solar energy which means that an on/off switch and change of battery are no longer needed.(We can supply these helmet or accessories in large quantity or to specification on demand)
2. **Hand held welding shield;** these polypropylene shell hand held welding shield are suitable for MIG and MMA welding. They are designed for easy weld inspection, to protect upper chest and throat from sparks and spatter. (Lens are purchased separately)
3. **Flip up welding helmet;** these helmets are resistant to high/low temperatures and flames retardant. The welding helmet has adjustable ratchet harness. (Lens are purchased separately)

Eye protection (welding goggle)

EIL supplies high quality and durable eye protection that are lightweight which includes;

4. Welding Goggles (Flip up lens)
5. Face shield visor
6. Sleek clear or dark safety glasses

Welding apparel

EIL supplies quality and durable welding apparels that are tough and rugged. We supply;

10. Welding coverall
11. Leather welders jacket
12. Leather welders sleeves
13. Welders apron
14. Genuine welding caps

EIL supplies high quality and durable respiratory protection with high exhalation valve. These respirators are designed to protect against fine dust, oil based mist and particulate metal fumes making it suitable for use in iron and steel foundries, when welding and soldering, in metal manufacture and construction.

Hand protection

We supply high quality and durable hand gloves that are tough and rugged for the task. These hand gloves come in different textures and length depending on their features. They are designed to be heat resistant, and water repellent.

Hearing protection

EIL supplies high quality and durable hearing protection to include;

7. Ear muffs
8. Banded earplugs
9. Ear plugs

Foot protection

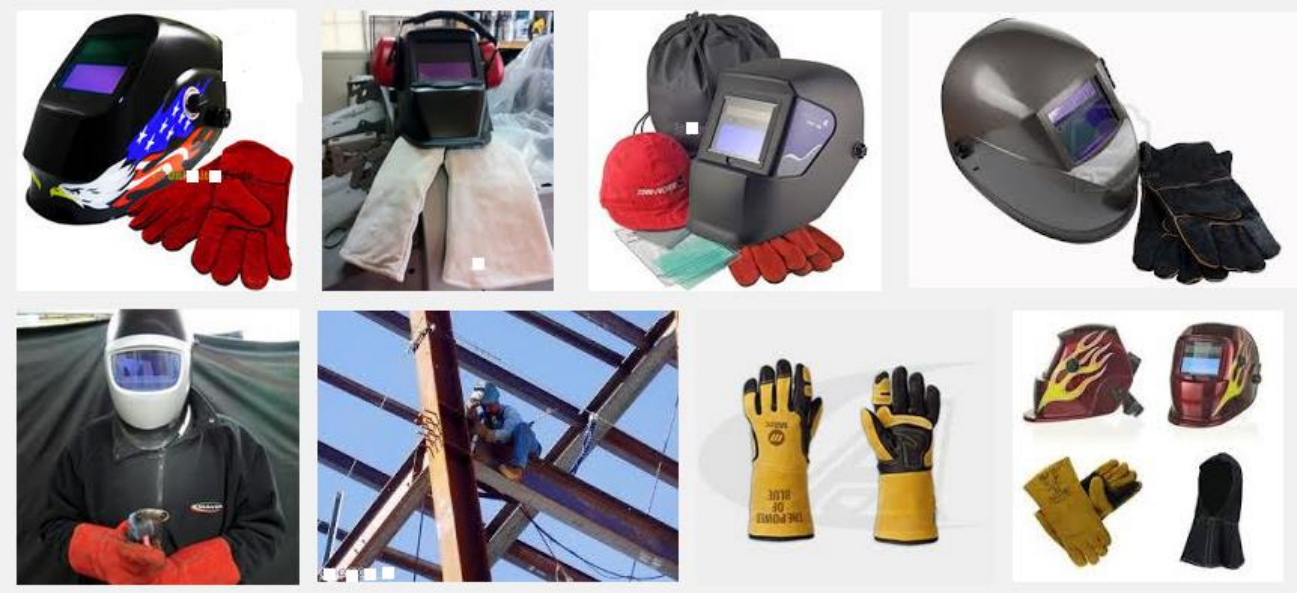

We also supply high quality and durable leather safety shoe, leather and rubber safety boots. These leather safety shoes and boots are designed to be water resistant, slip resistant, oil and gas resistant, abrasion resistant and good chemical resistant.

The rubber steel toe work boots are designed to be water proof, oil proof, anti-acid, anti-alkaline, anti-slip and anti-abrasion.

We have more products in stock. Send email or call us on (+234) 084-301-967 to find out about product of interest that is not listed or to get a quote.

If you can think it, is doable. If is doable, is achievable with EIL!

WELDING SAFETY

At EIL, we take safety in the work place seriously, that is why we have carefully selected the most innovative and highly rated welding safety products to satisfy your safety requirements.

Our range of welding safety;

WELDING HELMETS

- AUTO-DARKING SWITCH HELMET
- AUTO-DARKENING AUTO-TRACKER HELMET
- SPEEDGLAS WELDING SHIELD
- HAND HELD SHIELD
- BLUE WELDING HELMET
- SHIELD ADFLO SYSTEM
- AUTO-DARKING MULTI-PROCESS HELMELT
- SPEEDGLAS FLEXVIEW SHIELD
- SHORT SHELL HELMET
- ECLIPSE HELMET

EYE PROTECTION

- FLIP-UP WELDING GOGGLES
- ULTRA-VISION WELDING GOGGLES
- CLEARWAYS FACESHIELD
- GLASES

EAR/RESPIRATORY/HAND/FOOT PROTECTION AND WELDING APPAREL

- CLASSIC EAR PLUG
- WELDING FUME RESPIRATORS
- TIG GAUNTLET
- WELDING COVERALL
- LEATHER WELDER JACKET
- WELDERS APRON
- RUBBER HAND GLOVE
- LEATHER SAFETY BOOTS
- HYGIENE BANDED EAR PLUGS
- LONG WELDING GAUNTLET
- FIT MIG GAUNTLET
- WELDERS JACKET AND TROUSER
- LEATHER WELDERS SLEEVES
- WELDERS CAP
- LEATHER SAFETY SHOES
- RUBBER SAFETY BOOTS

ACCESSORIES

- AUTO-DARKING HELMET OUTER LENS
- AUTO-DARKING HELMET INNER LENS
- STANDARD LENS FILTER
- WELDING MASK (BLACK)
- DARK WELDING LENS
- AUTO-DARKING HELMET SWEAT BAND
- LAMINATED LENS FILTER
- PLAIN FACE MASK
- FAT PLAIN WELDING LENS
- PLAIN WELDING LENS

Welding and Fabrication

Welding and Fabrication

If you can think it,

Is doable.

If is doable,

Is achievable with EIL!

EIL has been in welding and fabrication for many years and has developed an unprecedented tap root in this particular industry giving us a sustainable and competitive advantage. We have experienced team and partners to bring into physical actualization those structures which you can only imagine, be it in fabrication, pipe maintenance, Gangways, Ladders and Cages, Racks, Loading platforms and many more.
We have the strength, skills, knowledge, ability and expertise to deliver exceptional welding and fabrication projects within set time frame and budget.

You do not need to have a perfect picture or perfect description of what you can imagine. We have the language of gods to communicate and eyes of spirits to interpret dreams.

See our product range below and for more of our capabilities, click Fabrication

Product range

Modular Skid

We offer Modular skid fabrication for power plant and maintenance to our clients.

We deliver custom pipe and structural steel fabrication (Modular skids, pipe bridges, pipe racks and loading racks) and pipe and structural steel solutions (Pipe spools/pipe maintenance). To see more of our capabilities, click Fabrication.

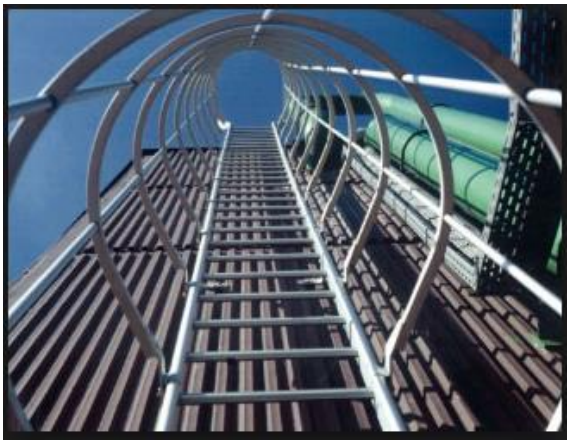

Gangways

Combining many years of experience, we design

and fabricate gangways of various types for many applications such as truck loading, platform access, tank access, ship access etc. we design them to be dethatched were multi-purpose use is required.

Fixed Ladder and Cages

We design and fabricate fixed ladder when climbing loading platforms, storage tanks, loading docks and many more with standard height. However, where height or the fear of height could risk lives we design 'ladder cages' to eliminate or reduce the risk associated with height.

Storage cages and Racks

We design and fabricate fixed storage cages for any purpose such as site cylinder storage, equipment storage cages and many more.

We also design and fabricate mobile Racks which can be used to stock industrial gas cylinders, manifold systems and many more. These Racks are designed to be transported with the aid of a forklift truck, pallet truck or Crane.

Loading platform

We design, engineer and fabricate loading platform to fit your tank truck loading, unloading, caring out inspection and sampling applications. These loading systems are just one of our diverse strengths. Fabricating durable, long lasting loading platform is only a portion of what we do.

Maintenance plan

We carry out welding maintenance plan of

diverse capabilities in the working environment to ensure that the working place is safe and on-going jobs in progress.

We have diverse welding and fabrication application not mentioned. Send email or call us on (+234) 084-301-96 to find out about area of interest not listed or to book an appointment.

SERVICES

If you can think it,

Is doable.

If is doable,

Is achivable with EIL!

Our services is also a core operation at EIL. As a very flexible company, we strive continously to ensure that our customers get the best of our services beyound expectations. We go extra miles to ensure that we deliver these services within set time frame because we understand the impact of time on our customers in delivering exceptional jobs to their customers.

The evolution system of our customers is also what triggers our operations which means that our services can be more specific and unique to a particular customer depending on their job demand.

Below are our services

For more information on our Services, click on each service, call (+234) 084-301-967 or click contact & Help

Oxy-Acetylene Inspection

Because of the risk associated with oxy-acetylene welding, which is often under mined, many people are injured each year and some even killed. These consequences have triggered this service to our customers in order to boost confidence, safe handling of welding equipment and cylinder storage.

Cylinder Rentals

We provide our existing customers and new starters with this great opportunity to ensure continuity in meeting targets or to bring their dreams to actualization without hassles. We rent our cylinders out on a short or long term, depending on your job demand. We also refill and exchange them to ensure no gap when doing your job.

Industrial Equipment Hire

We understand how demanding your job could be, making it imperative for you to need more expensive equipment to meet target even in a very short or long term bases. EIL provides industrial equipment hire service to our customers in diverse applications.

Cylinder Refill

We understand how unique cylinders could be to a particular customer and this is why we ensure the exact unique cylinders for refill are returned on agreed time. However, most jobs are time bound such that any gap could mean a slack in their project so we offer to stand the gap by giving our personal unique cylinders prior to refill of your own unique cylinders.

Delivery and Supply

We supply and deliver extensive range of product in small and large quantity on time to your place of use. We are a high profile company that have dedicated our services in ensuring our customers get the best from us which will in turn help them deliver the best to their customers.

Procurement & Logistics

This is one of our areas of strength. We have all it takes to ensure that all special or customised products related to your job that can only be sourced from outside the country are brought to your door step. We have readily available teams on air waiting for instructions on where to land. We are also strong and reliable in this particular industry.

Fabrication

This is our core strength in what we do. We pride ourselves continuously in delivery excellent contracting services in welding fabrication. EIL provides construction contracting services off or on-site. We handle multi-million dollar contract in various capacities and capabilities. We deliver them on time and within budget.

If you can think it, is doable. If is doable, is achievable with EIL!

Fabrication

If you can think it,

Is doable.

If is doable,

Is achivable with EIL!

Due to the risk associated with oxy-acetylene welding, which is often under mined, many people are injured each year and some even killed. These consequences have triggered this service to our customers in order to boost confidence, safe handling of welding equipment and cylinder storage.

Oxy-Acetylene Welders

Oxy-Acetylene welders are skilled in doing their jobs. However, there is the need to be morally professional and safety conscious about Cylinder storage, handling and connecting all Oxy-acetylene accessories correctly.
This Oxy-acetylene has many applications to include welding, cutting, heating and de-scaling. It is widely applied that at times welders forget that gas cylinders and torches are potentially very dangerous. Welders tend to get too use to these applications due to many victories in delivery perfect jobs and neglect the need to routinely check equipment.

Oxy-Acetylene Inspector

At EIL, we have trained certified Oxy-Acetylene inspectors who have gone through rigorous training abroad to achieve this qualification. This became imperative due to negligence observed among Oxy-acetylene welders. The risks associated with Oxy-acetylene welding not handled professionally are severe injuries, damages and death.
Our team of Inspectors are trained to ensure that our valued Oxy-Acetylene customers are routinely visited and trained on site to ensure that equipment are correctly fitted, in good working condition and that oxygen and acetylene cylinders are stored appropriately during and after use.

What we check for

Our inspectors carefully check to see if all equipment and accessories are in use, correctly fitted, in good working condition and cylinders stored during and after use.
The inspection include;

- Pressure regulator check
- Flashback arrestors check
- Hose check
- Welding torch check
- Nipples check
- Clips check
- Cylinder storage (In use)
- Cylinder storage (After use)

Benefit from the Inspection

Because we take safety in the work place very seriously, we offer this service to our valued customers EILolutely free. The benefits you get for free as a customer from the Inspection are;

- Safety alerts where applicable
- Work place injuries reduced or eliminated
- Welders are trained on how to fit and store
- Welders confidence and moral are distinctively high
- Pass inspection certificate issued

We provide our existing customers and new starters with this great opportunity to ensure continuity in meeting targets or to bring their dreams to actualization without hassles. We rent our cylinders out on a short or long term, depending on your job demand. We also refill and exchange them to ensure no gap when doing your job.

Existing customers

Our existing customers are those who buy with their own unique cylinders or with our already rented unique cylinders regularly.
Welding job could be more demanding in trying to meet target, consequently the need for more cylinders arises.
EIL instantly supplies additional cylinder/s on demand to our existing customer on site to ensure continuity before considering all formal documentation.

New starters

New starters are those who which to start welding jobs for the first time either in a small or large scale and those who are already in it but wish to rent from EIL for the first time.
Getting the exact type of cylinder, reliable constant supplier, and professional/expert advice could be frustrating that is why we have made this option available for new starters.
EIL is a strong and reliable company to provide the quantity of cylinders that you would need to start up your welding career. We also help fresh starters with welding cylinders accessories, equipment and equipment set up training.
To get started, why not click on contact and help to book an appointment now.

Refill and exchange

Once you become our customer by renting our cylinders, we take further responsibility to ensure that on demand, your rented cylinders are exchanged with filled cylinders whilst the used once are taken for refill. We also take responsibility to ensure that the cylinders are pressure and corrosion tested regularly before refill and exchange.

Cylinder rentals include;

- Single cylinder
- Mix and match (as much as you want)
- Cylinders in Rack/Pallet
- Manifold cylinders in Rack/pallet

To see how we deliver them, click on Gas delivery options.

Benefit of renting from us

- You accumulate point on your EIL point card when you buy gas.
- Delivering at point of use
- Expert advice are given where applicable
- Cylinders are pressure and corrosion tested
- Safety alert are given where applicable
- Work place injuries are reduced or eliminated.
- Welders confidence and moral are distinctively high
- Pass inspection certificate is issued.

Industrial Equipment Hire

If you can think it,

Is doable.

If is doable,

Is achivable with EIL!

We understand how demanding your job could be, making it imperative for you to need more expensive equipment to meet target even in a very short or long term bases. EIL provides industrial equipment hire services to our customers in diverse applications.

WHAT WE LEASE

Swamp buggy

Excavator

Forklift

Crane

Arc welder generator

Air compressor

Cylinder Rack

Bulldozer

Arc Welder Generators

EIL offers selection of the best industrial standard professional welding equipment and accessories available. We offer a comprehensive package of hire services which extends to supplying consumables, accessories, and giving support.
Hiring or buying used (Ex-hire) welding machines from us can be a cost effective option to buying a new one.

Buying used welding machine

All ex-hire equipment in the past was known to be thrashed and worn out, but now it is far from that.
All welding machines go into our workshop for thorough assessment, servicing and test, where faulty or damaged parts are replaced. When you buy one, you get a new welding torch, gas hose and choice of cable lengths.
To find out what we currently have available click contact & help to contact us now.

Compressor /Generator

We have high standard air compressor to generator compressor of various CFM for hire. These rugged machines are available in different CFM and Psi to suite your job need. The compressor generators are brilliant choices because they also generate electricity in different KVA.

Forklift Trucks

We sell or lease our Forklift trucks of different tonnes on a short or long term bases. We also have trucks designed for container jobs.
Due to our experience in industrial gas and construction environment; we have extended our services to silent project demand for lifting of finished or part work from stage to stage in the working environment.
Hiring from us could mean peace of mind because our forklift trucks are sound and ready.

Cylinder Racks

EIL have readily available racks and also build racks to fit specific purposes where racks are needed to carry specific number of cylinders in larger or smaller quantity. EIL has made this option available to ensure that health and safety in the work place are never compromised. In the event where there are many standing cylinders in a vessel and there is need for transporting them to shore or from shore to vessel and you don't have enough cylinder racks to keep them safe throughout your project life spam, EIL has made it possible by providing cylinders rack that have been lift tested and water resistant to withstand the salty nature of the working environment for a longer time than any other.
For any other reason, we are here to make sure you get the quantity of cylinder racks to meet your job demand.

Additional services

Service is our backbone, our experience is vast, our knowledge is extensive and our support is total, that is why our second to none skilled engineers are dedicated towards;

- To support hired equipment
- On-site repairs
- Repair your own equipment
- Workshop repairs
- Technical advice
- Maintenance programs
- Gas inspection

Benefits of Hiring from us

- You accumulate point on your EIL point card when you buy accessories and consumables from us (welding machines accessories and consumable)
- Delivering equipment at point of use
- Expert advice are given where applicable
- Equipment are replaced when taken for workshop repairs
- All accessories and consumables are supplied on demand
- Welders confidence and moral are distinctively high

Cylinder Refill

If you can think it,

Is doable.

If is doable,

Is achivable with EIL!

We understand how unique cylinders could be to a particular customer and this is why we ensure the exact unique cylinders for refill are returned on agreed time. However, most jobs are time bound such that any gap could mean a slack in their project so we offer to stand the gap by giving our personal unique cylinders prior to refill of your own unique cylinders.

Cylinder Refill

At EIL, we use the term 'cylinder refill' to describe where a customer or a potential customer wish to have their personal unique cylinder refilled and returned to them without exchanging the cylinder.

What we refill

- Single cylinder
- Two or more cylinders (single gas)
- Mix and match cylinders (different gases)
- Cylinders in Rack/Pallet (single gas)
- Cylinders in Rack/Pallet (Mix and match. Different gases)
- Manifold cylinders in Rack/Pallet (single gas bank)
- Manifold cylinders in Rack/Pallet (Mix and match gas bank)

Back-up Options

- We refill customer's personal cylinders without exchanging them. However, where your cylinder has to go for test, we offer to give our own personal cylinder for exchange to ensure continuity on your on-going job.
- Also, where filling your personal cylinders means your job has to wait and time waste could mean more harm, we also offer to give our own

personal cylinders for exchange to ensure continuity on your on-going job.

- Where your job becomes demanding and you do not have the cylinder match, we offer to exchange our personal cylinder for your cylinder then give back on return of our personal cylinder. E.g. we give you Oxygen cylinder for your Acetylene cylinder. (For new or first time customers, your cylinder may have to undergo test to take on this option)
- Where also your job becomes more demanding and you do not have your own cylinder on ground for exchange, we offer to give our personal cylinders to ensure you meet target. (This option is not applicable to new or first time customers)

Benefit of refilling from us

- You accumulate point on your EIL point card when you refill from us
- Delivering at point of use
- Expert advice are given where applicable
- Back-up options
- Oxy-Acetylene inspection
- Safety alert are given where applicable
- Work place injuries are reduced or eliminated.
- Welders are trained on how to fit equipment and store cylinders
- Welders confidence and moral are distinctively high
- Pass inspection certificate is issued

Procurement And Logistics

Fabrication

Procurement And Logistics

If you can think it,

Is doable.

If is doable,

Is achivable with EIL!

EIL procurement and logistic system is a major operational tool in meeting target in the oil and gas industries and welding and fabrication industries. Our broad range of procured materials are available in stock for the Oil and gas industries as well as welding and fabrication industries.
We also ensure that all special or customised products related to your job that can only be sourced from outside the country are brought to your door step.

We have readily available teams on air waiting for instructions on where to land.
We are also strong and reliable in this particular industry.

Special Product

We refer to product as special when they cannot be sourced locally (In the country). Hence, the need for importation.

Customised product

We refer to product as customised when they cannot be manufactured locally (In the country). Hence, the need for importation.

Why EIL

Our experience over the years with our valued customers has also triggered this service. Projects could be so complicated, demanding and sometimes frustrating when materials needed could not be sourced locally. With this knowledge, we extended our service boundaries to include procurements of customised and special product.

Procurement to oil and gas industries

Procurement to welding and fabrication industries

Over the past fifteen years, we have procured both customised and special goods of diverse applications worth millions of Naira with 100% safe delivery. Our success stories rely so much on our solid and vibrant organised professionals who are based locally and international. When we get detailed specification of our customer's product, whether special or customised, we systematically go into extensive and rigorous research across the globe to get best reliable deal without compromising quality. We also evaluate the risk and its concomitants by carrying out a risk assessment on each product and before final decision we consider custom requirements to ensure our usual safe delivery.

We cannot be specific on what we can procure under special or customised materials as our team of experts are very diverse in this industry. Inasmuch as your customise product is related to your job and sourcing it locally is a problem, EIL is here to help you check even within the country before considering outside the country. If you are also looking for special (new or used) product related to your project such as Concrete pump truck, concrete mixer, Heavy duty mobile crane, bulldozer, steel cutter plasma machine, excavator, steel pipe machine, cutting and bending steel machine, Flour mill machinery, Rice mill machine, Oxygen gas tank and many more. What you intend to import does not need to be among the few list above because our procurement and logistic system cover sectors in the oil and gas industries, welding and fabrication industries, mining industries and milling industries.

We are always here to help you go through a smooth path with peace of mind while delivering exceptional service.

Your benefits

- We do the hard maths
- You get the peace of mind
- On time delivery at point of use
- We bear your burden on how to go about the process.

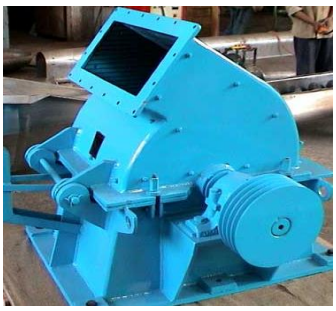

Procurement of new or used machineries to industries

Copy milling machine for wood industries

Fabrication

Fabrication

If you can think it,

Is doable.

If is doable,

Is achivable with EIL!

This is our core strength in what we do. We pride ourselves continuously in delivery excellent contracting services in welding fabrication. EIL provides construction contracting services such as on-site construction and terminal construction. We handle multi-million dollar contract in various capacities and capabilities. We deliver them on time and within budget.

EIL fabrication unit is best described as a specialty custom fabricator with in house design, engineering and installation capabilities. Our experience over the past 30years in this particular industry has given us a sustainable and competitive advantage.

Pipe Bridge

Our team of welders and partners are certified in various welding profession, making us a perfect choice to handle welding projects in custom pipe and structural steel fabrication (Modular skids, Pipe bridges, pipe racks and loading racks) and pipe and

structural steel solutions (Pipe spools/pipe maintenance)

Pipe Spool

We are able to weld a multitude of materials to the highest of standards from light gauge aluminium sheet to heavy steel sections, pipe and plate. These services are offered at the customer's site or from our own workshop. We service all Business sectors; Industries, Utilities & Power generation, Petro/Chem, Renewables, Marine, Construction, etc.

Modular Skid

We are also able to offer a full range of engineering disciplines to enable the completion of any engineering work package or maintenance contract. We are able to offer our services on the following basis; Local, National and International.

Pipe Racks

We are always here to help you go through a smooth path with peace of mind by ensuring completion of projects within set time frame and budget.

Your benefits

- We do the hard maths and
- You get the peace of mind
- We deliver and mount workshop finished products at point of use and on time

If you can think it, is doable. If is doable, is achievable with EIL!

B.O.C & AIR LIQUIDE AUTHORISED AGENT

GAS PIPING

EIL carries out neat professional piping jobs in medical, industrial and domestic level for the purpose of efficiency and health and safety control.

Medical gas piping

Medical piped gas system supply in hospitals and most other healthcare facilities are essential for supplying piped oxygen, nitrous oxide, nitrogen, carbon dioxide and medical air to various part of the hospital. These systems are modem way of facilitating health services.

Oxygen

Piped Oxygen maybe used for patient requiring supplemental oxygen via mask usually accomplished by a large storage system of liquid oxygen at the hospital which is evaporated into a concentrated oxygen supply. Pressure is usually around 55 psi. In small medical centres with a low patient capacity, oxygen is usually supplied by multiple standard cylinders

Nitrous oxide

Piped Nitrous oxide is supplied to various surgical suites for its aesthetic functions during pre-operated procedure. Delivered to the hospital in standard tanks and supplied through the medical gas system. System pressure around 50psi.

Nitrogen

Piped Nitrogen is usually used to power surgical equipment during various procedures. Pressure range around 175psi to the various locations.

Carbon dioxide

Typically used to inflate or suspend tissues during surgery and also used in laser surgeries. System pressure are maintained at about 50 psi

Medical air

Piped Medical air is supplied by a special air compressor to patient care areas using clean outside air. Pressures are maintained around 55 psi. Medical air can be used as surgical air when the pressures are raised to 7 bars. Surgical air is majorly used in driving pneumatic tools like dental hand pieces. Oxygen can be used as a medical air but medical air should never be used as oxygen

Medical test gas mixtures

There are many gas mixtures used for clinical and medical applications. They are often used for patient diagnostic such as lung function testing or blood gas analysis. Test gases are also used to calibrate and maintained medical devices used for the delivery of aesthetic gases.

Medical culture growth mixtures

Culture growth applications include controlled aerobic or anaerobic incubator atmospheres for biological cell culture or tissues growth. Controlled aerobic conditions are created using mixtures rich in oxygen and anaerobic condition mixtures rich in hydrogen or carbon dioxide

Medical vacuum

Medical vacuum is a hospital supports vacuum equipment and evacuation procedures, usually supplied by various vacuum pump systems exhausting to the atmosphere. Continuous vacuum is maintained around 22 inches of mercury.

Waste Anaesthesia gas disposal

Waste anaesthesia gas disposal or WAGD in a hospital anaesthesia evacuation procedures. Although it uses the same vacuum pump as the medical vacuum system, the piping may be a separate line from the source or can combine with the medical vacuum per NFPA 99. Continuous vacuum is maintained around 15-19 inches mercury.

Industrial gas piping

Many High-pressure pipelines that transport most of the world's oil and gas are at or nearing the end of their design life stage and will be at an increasing risk of failure due to corrosion, metal loss, internal defects, fracture, fatigue, and coating failure. As you can imagine, the integrity (safety, reliability and security of supply) is a major consideration for operators and managers alike.

EIL can install piping networks for a wide range of industrial facilities, including refineries, petrochemical plants, gas / oil separation plants, etc. EIL also carries out maintenance of petrochemical installation.
Our knowledge of pipeline corrosion causes and maintenance response has given us an edge in this industry.

Corrosion of oil and gas pipelines is directly related to the internal and external (soil) conditions present for the unique location of a given pipeline, as well as to the materials of manufacturing and the quality of these materials. Pipelines in submerged conditions are subject to a greater risk of corrosion because of the continuous presence of corrosive moisture – the electrolyte necessary to

have the electrochemical corrosion reaction processed. The specific chemical composition, resistivity and redox potential of the soil/water table will determine the relative corrosivity or risk of corrosion.

In addition to the soil characteristics, it is useful to measure the electrochemical potential of the structure in the electrolyte (soil or water). This is done using methodologies developed by the underground pipeline industry and other professional societies and regulatory organizations. The structure-to-soil potential of a buried asset can be related to the present state of corrosion, with less electronegative values of potential, indicating an increasing likelihood of active corrosion. By using sacrificial (galvanic) cathodic protection or impressed cathodic protection, corrosion can be mitigated by shifting the structure-to-soil potential to more electronegative values.

Internal corrosion is most often due to microbiologically influenced corrosion (MIC) in oil transportation pipelines and storage tanks. EIL engineers have a deep understanding of MIC and are well equipped to diagnose, monitor and resolve even the most complex of MIC conditions.
We are very good in this profession.

Domestic (propane) gas piping

EIL plan and construct a risk free private and commercial domestic (propane) gas piping installation to eliminate fire outbreak.

The word 'gas' can be used to describe the physical state of many substances. While a number of gases have very specific safety requirements, this guidance relates to the use of gas as a fuel within the workplace.

Gas is commonly used in the workplace for heating the work environment and water supplies, cooking and for processing products.

The gas itself can come from a number of sources including natural gas, liquefied petroleum gas (LPG) and methane. The risks of explosion, poisoning, etc. are similar for all.

Gas can be supplied either piped into the premises from the mains supply or a storage tank, or in small cylinders used close to the appliance with a flexible hose connection.

The risks of using gas

When gas does not burn properly, or is used in an area without adequate ventilation, it produces excess carbon monoxide (CO) – a colourless, odourless gas. This can happen regardless of the type of gas being burned, whether from bottles or from a mains supply.

When inhaled, carbon monoxide binds with the haemoglobin in the blood. This reduces the blood's ability to carry oxygen, starving the body of oxygen and poisoning it.

Symptoms of carbon monoxide poisoning include tiredness, drowsiness, headaches, nausea and chest and stomach pains.

In extreme cases, **carbon monoxide poisoning can kill** within a matter of hours.

There is a risk of carbon monoxide poisoning:

- if there is inadequate ventilation in the room where the appliance is located
- if the ventilation system is blocked and cannot vent the system properly
- if the appliance has not been regularly maintained by a competent person

- if you use an inexperienced engineer to pipe your premises

Liquefied Petroleum Gas (LPG) safety

LPG (cooking gas) can be referred to commercial **propane or butane**. LPG Autogas (LPGA) is a mixture of these two gases used as a vehicle fuel.

Additional precautions are required when using your cooking gas (LPG):

- ensure adequate ventilation is available in the area where the gas is being stored and used, particularly at low level, since LPG is heavier than air
- have LPG appliances maintained by an engineer qualified to examine such equipment
- try to store as few gas cylinders as possible, arranging for more frequent deliveries where necessary, since storage facilities must meet certain safety standards
- Make sure that gas storage facilities meet the standards laid down in The LPG Association Guidance (see further information).

When storing LPG, the LPG Association stipulates that:

- The storage area is secured against attack from vandals, etc.
- warning signage is in place to show the hazards associated with LPG
- Cylinders are stored in an upright position (unless their labelling indicates that they can be stored otherwise)
- There is clear access to all cylinders
- Fire fighting facilities are available
- The store and its surroundings are kept free of flammable sources and combustible materials including vegetation
- The storage area is located away from open drains.

For more information contact us.

If you can think it, it's doable. If it's doable is achievable with EIL!

WELDING TRAINING

Our experience over 45 years in the fabrication industry has given us a sustainable competitive advantage, making us the preferred choice for freshers or welders who wishes to acquire new or more skills in the welding industry.

No sustainable development can be achieved in the oil and gas sector without local involvement.

Enhanced local content development will encourage technological transfer and empowerment of indigenous participants/stakeholders in oil/gas sectors. Hence reducing hostilities in the oil and gas sector.

Efficient and competitive local contractors will encourage indigenous entrepreneurial development and to serve as a springboard to launch out as big Contracting firms with resources and expertise similar to international firms. Investment in local content will ensure improvement in standard of living for the people.

Most importantly, we are committed to achieving "zero accidents." Our safety standards and procedures have brought us recognition as one of the safe indigenous companies in Nigeria, benefiting workers and saving our customers time and money.

We have carved out a section of our operations to help new starters to achieve their dreams and even help already welders (refreshers) to professionalise in other welding professions to certification.

We train comprehensively leading to recognised certification in

- Shielded metal Arc welding
- Shielded metal arc welding/Gas metal Arc welding
- Gas Tungsten Arc welding/ shielded metal Arc welding
- Flux Cored Arc welding
- Submerged Arc welding
- Pipe Fitting
- Structural Fitter
- Rigging

Welding health and safety course leading to completion certificate is highly recommended after completing any chosen training of interest.

TRAINING CATALOGUE FOR YEAR 2016

COURSE CODE	COURSE TITLE	WHO TO ATTEND	CERTIFICATION	DURATION
SMAW	Shielded Metal Arc Welding	Fresh individual who wants to start welding	Training and Certification	20Days
SMAW&GMAW	Shielded Metal arc Welding/Gas Metal Arc Welding	Individual who has started welding before but needs additional specific skill	Training and Certification	12Days
GTAW/SMAW, ARGON	Gas Tungsten Arc Welding Shielded Metal Arc Welding	Advance welding skill for those who are already welding	Training and Certification	30Days
FCAW	Flux Cored Arc Welding	Advance welding skill for those who are already welding	Training and Certification	7Days
SAW	Submerged Arc Welding	Advance welding skill for those who are already welding	Training and Certification	14Days
PPFT 004	Pipe Fitting	For those who has structural fitting skills already	Completion Certificate	21Days
STF 001	Structural Fitter	Fresh individual who wants to start pipe fitting	Completion Certificate	30Days
RGG 011	Rigging	All persons	Completion Certificate	4Days
WHS 001	Welding, Health, and Safety	All those in the welding field	Completion Certificate	4Days
Scfd 001	Scaffolding	Fresh	Completion Certificate	15Days
Scfd 002	Scaffolding	Refresher	Completion Certificate	3Days
Scfd 003	Scaffolding	Inspector	Training and Certification	4days
Forklift 001	Forklifting	Fresh	Training and Certificate	7Days
Forklift 002	Forklifting	Refresher	Completion Certificate	3Days
SSDP	Stainless Steel Duplex Pipe	Advance Welding skill transfer	Completion Certificate	5Days
CNM	Copper Nickel Material	Advance Welding skill transfer	Completion Certificate	5Days
IPM	Inconnel Pipe Material	Advance Welding skill transfer	Completion Certificate	5Days

AMW	Aluminum Material Welding	Advance Welding skill transfer	Completion Certificate	5Days
SMAW	Shielded Metal Arc Welding		Refresher Certificate	3Days
SMAW&GMAW	Shielded Metal arc Welding/Gas Metal Arc Welding		Refresher Certificate	3Days
GTAW/SMAW	Gas Tungsten Arc Welding Shielded Metal Arc Welding		Refresher Certificate	3Days
FCAW	Flux Cored Arc Welding		Refresher Certificate	3Days
SAW	Submerged Arc Welding		Refresher Certificate	3Days
ABS	American Bureau of Shipping		Refresher	2Days
ABS	American Bureau of shipping		qualification	1 Day
PPFT	Pipe Fitting		Refresher Certificate	3Days
STF	Structural Fitter		Refresher Certificate	3Days

If you can think it, it's doable. If is doable, it's achievable with ABS!

LABOUR SUPPLY

Our diversified relative experiences over the years has also triggered this unique service to our clients because we know that the strength and project delivery target rely totally on the experience and qualifications of the manpower supplied to execute the project.

Welcome to EIL Manpower solutions. We are fast rising in manpower supply with an ever-growing list of satisfied clients. We supply well skilled, trained and certified man power in diverse professions in the construction industry such as ***welders, filters, help mate, handy men, mechanical engineers,***

supervisors, riggers, scaffolders, technicians, project managers/project support managers etc. in numbers as may be required to execute a tasking project. We can also recommend the skills required to handle high profile project.

EIL Manpower solutions has been successfully recruiting for and supplying companies across Nigeria with some of the best available workers who seek career opportunities.

Customer satisfaction is our priority that is why at EIL we are very flexible with hours and have suitable options on how to buy depending on your payment plan.

At EIL, our customers could either purchase product by placing an order, counter service or by EIL point card system.
Our customer service team are available Monday to Saturday every week and on special arrangement we operate even on Sundays or 24/7 including public holidays.

Official Hours

Monday to Friday 8:00am – 5:30pm
Saturdays 8:30am – 4:00pm

On special arrangement by giving notice during official hours we operate 24/7 even on public holidays to ensure you meet target.

Placing An Oder

Once you are registered with us, we draw out a plan to suit your choice of payment which could either be cash or cheque and on a weekly, monthly or on agreed period of time. This means therefore that as a registered customer you can place an order either by calling our customer service, sending an email or by counter service and thereafter make payment according to payment plan.

- Customer service (+234) 081-5926-0032
- Email- info@emmadios.com
- Counter service (Walk into any branch)

Counter Service

This option is applicable to anyone who wishes to enjoy a smooth transaction with EIL. All you need to do is to pop into your local EIL branch and place an order. For registered customers, we follow planned procedures to make payment while for regular (None registered) customers we accept cash payment, bank card via a chip and pin card machine or combination of cash and bank card payment.

EIL Point Card

This option of payment is available to our entire customers. When you continue to buy our products that fall within the point system, you continue to accumulate points.
You decide when to buy with your EIL point card on any of our product that falls within or outside the point system.
To read more click EIL Point card.

What you should know

- It is your responsibility to key in to the EIL point card system and to claim point at any cash transaction or when payment is made up to or above the point mark in each single transaction.
- When you register for your EIL point card, it means you have opened a cashless account with EIL.
- You can only make transactions on your EIL point card with EIL.
- When you register with your company name, you can have more than one signatory to your account, if with own name it must be a single signatory.
- Your registration number is your account number and will not change unless you close your account.
- The 'point card number' changes any time lost card are replaced.
- EIL point card does not have expiry date.
- It is your responsibility to declare your EIL point card details on every transaction in order to claim your points
- When you register, you cannot claim point on past transactions but on transactions thereafter you have registered.

Where your points are

At EIL, we have products that fall within and outside the point system. Points are usually the same, fixed for a period of time. However, there are times products on promotion appear to carry double points. Double point being the highest are usually on promotional offers. When you register with us we send you list of all our products and the point they carry. We also update you regularly via email on any new product in stock that falls into the point system. When we have products on promotion which are usually for a short period of time we send you email to alert you about the promotion and the point equivalent they carry.

How you collect points

When you buy products that fall within the point system you accumulate points immediately when we receive payment for the items bought. When you buy products that are outside the point system but in quantity and in a particular category and single transaction, then you can accumulate point when it exceeds the CAP.

For regular customers who usually pay cash or card payment, they get instant point when payment is received while for registered customers with payment plan, their points become active when we clear their cheque or receive cash or confirm payment.

We send email to customers to let them know their total points and when their points become active. Customers can also pop into their local branch to check their account, call customer service or send email.

How to buy

When you register, you get your EIL point card which enables you to accumulate point on your account.
To make payment, we issue you a voucher every three months which will be valid for a month. If you don't spend it within that month it goes as a rollover to your next voucher which will come up after another three months.
When you get your voucher, you can spend it on any of our product or use it to complete a cash payment, cheque or bank card payment via a chip and pin machine. When you get the voucher, fill in the required details, sign and stamp before using it.
In the invent of refund, you cannot get EIL point card payment in another form apart from vouchers because it is a cashless account and all transactions on it are cashless.

Pop into your local EIL branch, get registered and find out more on how to make payment with your EIL point card Voucher. The earlier you get registered; you begin to accumulate point on products that falls within the point system.

Don't miss out!

EMMADIOS INDUSTRIAL LIMITED

About us

Company History

Our Commitment

The EIL Drive

Vision and Mission

About Us

EMMADIOS INDUSTRIAL LIMITED (EIL) is an indigenous company which started as non-limited liability company (EMMADIOS FABRICATION AND EQUIPMENT SOLUTIONS) in 2008 as fabrication and equipment leasing company. EIL core operation was fabrication and leasing of equipment.

Over the years, EIL gained experience and expanded in size and operational portfolio leading to Incorporation as EMMADIOS INDUSTRIAL LIMITED in the year 2011.

EIL over the years has built a robust capital base, resources and credit facilities to undertake multimillion dollar projects.

Today, EIL with reasonable experience over the years is in the business of Welding and fabrication contracting services (to handle multi-million naira projects in pipe maintenance, gangways, ladder, modular skids, loading platforms, gas cylinder rack and many more), welding equipment and heavy industrial equipment leasing/sales. In addition to our start-up operation, EIL has also expanded its operational boundaries with a portfolio to include labour supply (welders), industrial gas and welding consumables, piping (medical, domestic and industrial gas piping), and lots more.

In meeting every challenging demand we have pitch our tents by creating formidable alliances with a force of over 400 employees working in different sectors and professions over the years and more so we have a very good and robust working capital base, sound financial credit record and current access to bank credit facilities. We are able to undertake and meet all our operational need and contractual commitments.

EIL has developed in strength and size with reasonable experience to face any challenge in our profession. We have team of experts in various departments to handle any project in our job description.

EIL has been supplying atmospheric gases which includes oxygen, nitrogen and argon. Today, Its portfolio includes other different gases and mixtures and has also expanded its boundaries to render services which include Haulage and procurement to the oil and gas industry

EIL strategy is geared towards sustainable earnings-based growth and focuses on expanding its channels with forward-looking in rendering exceptional services and quality products. Furthermore, we act responsibly towards our business partners, employees, society and the environment. In all of our operations we are committed to technologies and products that unite the goals of customer

value and sustainable development.

If you can think it, is doable. If is doable, is achievable with EIL!

EMMADIOS INDUSTRIAL LIMITED

About us

Company History

Our Commitment

The EIL Drive

Vision and Mission

Our Commitment

We are committed to Health and Safety. We believe excellent standard in health and safety are vital to the success of our people and our business.
Together we stand! Divided we fall!

At EIL, we value the health, safety and well-being of our employees, customers, contractors, guests, members of the public and visitors to our place. Together we must aim for exemplary performance in health and safety and not see it as an optional extra or a separate function; it is an integral part of our productivity, competitiveness and way of doing business.

If we are to truly embrace the successes available, it is essential that we develop a positive health and safety culture, whereby the values, beliefs, practices and attitudes we all share will reduce risks, accident and ill health. Everyone plays an essential role in shaping the health and safety culture of EIL. we hereby ask everyone within the business to work with us in recognizing hazards and reducing risks at work. Only by working together we will avoid accidents and seek ways to improve the health and safety of everyone.

We believe that the standard of health and safety required by the law should be seen as a minimum, and accordingly we must continually seek to exceed legal requirements throughout our business by:

- Allocating the same importance to the goals set for health and safety as all other business matters
- Continually identifying hazards, assessing risks, developing control measures, and making sure that the control measures in the work place either remove any hazards identified or reduce the associated risk; to at least a reasonable level
- Reviewing our assessment of work-related risk on an ongoing basis to make our places of work safer
- Not tolerating work-place relate violence and disorder, and actively seeking the means to avoid the occurrence of such
- Appointing a health and safety Co-ordinator in each branch to promote and develop the understanding of health and safety
- Organizing health and safety circles in each branch so that health and safety is central to business operation through the active participation of our employees
- Educating employees on the importance of the good maintenance of equipment and buildings, in particular through the system of planned and daily maintenance
- Carefully selecting contractors to enhance the provision of excellent health and safety throughout our business
- Providing suitable and sufficient training for all employees, commensurate with their position in the business, so they can fulfill the responsibilities and duties allocated to them
- Investigating all incidents and accidents to enable the full identification of the underlying causes, and create actions to avoid reoccurrence
- Conducting regular inspections and audits of health and safety by

employees trained to do so.

We the directors accept responsibility for the development of the company's health and safety policy and its implementation into our place of work, however it is the responsibility of everyone to ensure agreed procedures are always followed, and that the training given is put into practice. It is essential that if hazardous situations or dangerous practices are seen the management team should know immediately.

Our health and safety policy is review at regular intervals to ensure that it is still accurate and relevant. If a review was to highlight any shortcoming, or new legislation is introduced, the policy will be revised accordingly. To support our aim for exemplary performance in health and safety, we will also seek competent advice, as necessary, from the relevant appointed personnel with EIL.

We the directors of EMMADIOS INDUSTRIAL LIMITED are committed to ensuring the success of our policy and the promotion of positive health & Safety throughout our work place.

If you can think it, is doable. If is doable, is achievable with EIL!
